November 23, 2026

Poll Report

uComms conducted a survey of 1,179 members across the State of South Australia on behalf of the Adelaide Park Lands Association (APLA) and the South East City Residents Association Inc. (SECRA) during the evening of 18th November 2026 using a self-completed and open-ended automated SMS and Voice polling methodology.

Executive Summary

South Australians oppose the Park Lands MotoGP circuit by more than two to one. Asked a neutrally worded question describing the Government's plan, before any further information was provided, 60.3% of South Australians oppose the circuit (39.8% strongly) against 24.8% in support, with 14.8% neutral.

Opposition hardens as voters learn more. Informed of the Government's own published tree removal figures, opposition rises to 67.4%, with strong opposition climbing from 39.8% to 51.5%. Informed of independent cost estimates, opposition reaches 68.7%, with 54.8% strongly opposed.

Voters reject the claim of a mandate. 66.4% disagree that Labor's win at the March 2026 state election gives the Government a mandate to build the circuit, against 21.0% who agree. Among those who voted Labor in March, a clear majority, 55.0%, disagree.

The Government's own voters oppose the project. At the opening question, voters who supported Labor in March opposed the circuit 50.4% to 33.2%, with opposition among them reaching 59.9% once cost estimates were put.

Opposition is stronger in the regions than in the city. Regional South Australians oppose the circuit 65.9% to 22.3%, with 50.7% strongly opposed, compared with 58.8% opposition in metropolitan Adelaide. Regional respondents also oppose the Park Lands being used for motorsports in general, 61.1% to 24.1%. The result cannot be characterised as inner-city sentiment.

Opposition is broad. Statewide, a majority opposes the Park Lands being used for motorsports in general, 50.3% to 30.2%. Opposition to the circuit leads in every age group and is strongest among women (67.9%) and voters over 50. This is a high salience issue: 82.9% of respondents had already heard about the plan, 58.0% a lot.

Fieldwork 18 November 2026. n=1,179, weighted by age and gender to ABS population distribution. Margin of error +/- 3.3% on the effective sample of 1,003. Conducted in accordance with Australian Polling Council disclosure standards; full methodology on the final pages of this report.

Statement from uComms

"The automated voice and SMS methodology used in this research is standard practice across the Australian polling industry and sits behind much of the published polling Australians read every week. uComms is a founding member of the Australian Polling Council, and the full question wording, sample, weighting and margin of error are published with this report and at ucommsapc.info. We stand behind these results and welcome any questions."

Katie McRae, Director, uComms
